

THE VIRUS HAS HIT AUSTRALIA!!

Where is the safest place to go in  
Australia to survive a zombie  
apocalypse?

# The following factors of an area are critical for you to survive a zombie apocalypse:

- Climate
- Population (age, density)
- Access to resources
- Topography
- Surrounding areas
- Number of hospitals, airports and shops

## The climate is important because...

It must be stable enough that you can grow crops to survive and not be worried about natural hazards such as floods or cyclones.....

It is also important to have a climate which is suitable for humans to live in without getting sick

**The population is important because...**

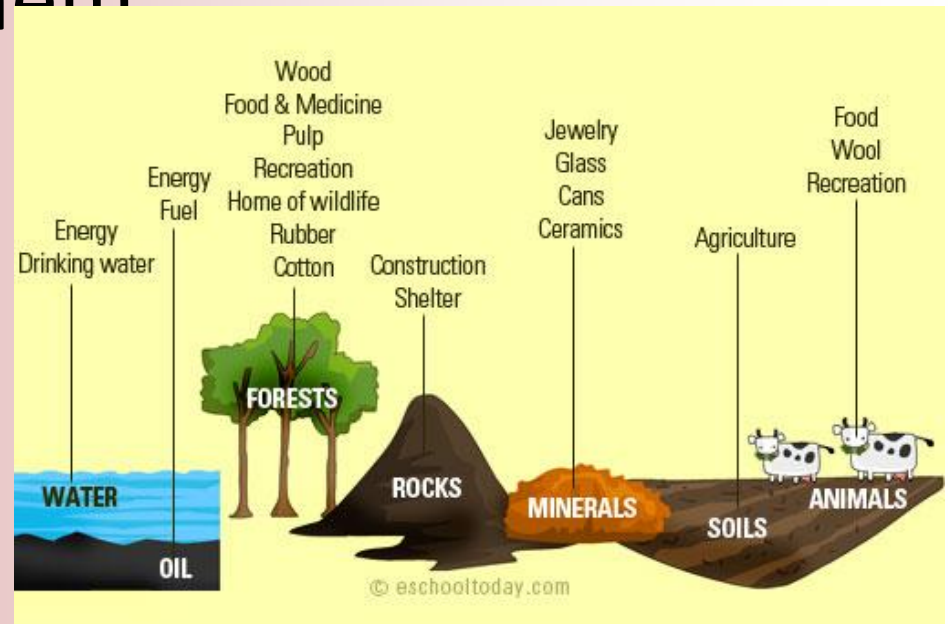

Avoid areas with large numbers of 0-5 years old  
and 60-100 years olds

If an area has a high **population density** a virus  
is more likely to spread....

The access to resources is important because...

You need to be able to access resources vital to survive, such as fresh water, food, soil and petrol. Natural resources are more reliable than manmade, so it is vital that the area you live in has access to them

**The topography is important because...**

**The topography of an area can be used at an advantage in a zombie apocalypse. You can use gullies to trap zombies, mountains to hide from them or steep hills to run away. The topography of an area can also alter the climate, affecting crops and human health.**

**The surrounding areas are important because...**

If you have a heavily populated urban area near you, you might be susceptible to an invasion of zombies at any time

**You can also use your surrounding area (such as an ocean or main road) to run away from a swarm of zombies.**

The number of hospitals, airports and shops ...

You need to be able to access and stock up on important resources such as food, medicine, clothing and transportation.

Can you think of any other characteristics that are important in making a place safe in a zombie apocalypse?

# Research Activity

Where is the safest place to go in Australia to survive a zombie apocalypse?

*Brisbane*

*Cairns*

*Melbourne*

*Whitsundays*

*Broome*

*Kakadu National Park*

Feature	Information
Climate:	
Population:	
Access to Resources (water, crops,)	
Topography (could you hide?)	
Hospitals/pharmacies:	
Shops:	
Natural Hazards:	

- If a zombie apocalypse was to occur in Australia, I would rather be in \_\_\_\_\_.
- This is because \_\_\_\_\_  
\_\_\_\_\_.
- As an example, \_\_\_\_\_  
\_\_\_\_\_.
- Therefore, I would rather be in \_\_\_\_\_.
