China

Task: Who was born overseas or had one of more of their parents/caregivers was born elsewhere?

Tally the results:

- How many students were born in Australia of Australian born parents?
- How many were born overseas?
- How many had at least one parent born overseas?

What does this tells us about the diversity of the Australian population?

Use coloured pins to mark the various countries that students are linked to either directly (by birth) or indirectly (by the birth place of their parents).

Task: of the connections you have with other places. These might include:

- Relatives and friends living in other places
- Places visited by you or other members of your family
- Places in the news
- Places in which a film you have seen was set
- Places to which your family has a special connection through ancestors or culture.

Make these places on a map of the world.
