

Climate and Vegetation

There is a close link between climate and vegetation. These photographs show the landscape and are vegetation typical of each climate zone.

Australia's tropical north, Kakadu, NT

Australia's semi-arid north

Australia's arid centre, Simpson Desert

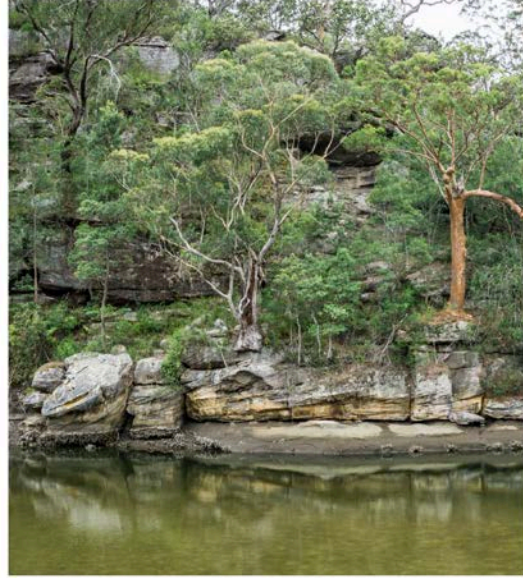

Western Australia's Mediterranean landscape

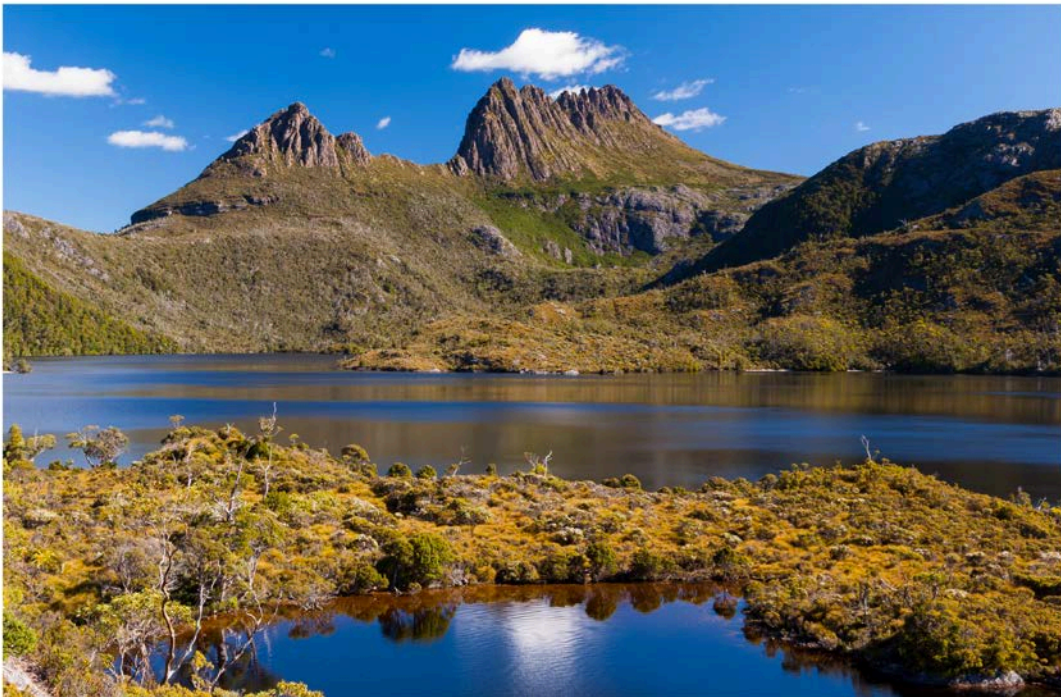

Lesson 5: Resource Sheet 2

Sub-tropical climates,
North Queensland rainforest

Warm temperate, climates, Eucalypt
forest near Sydney

Cool temperate climates, Cradle Mountain, Tasmania
